**SOLID WASTE MANAGEMENT:** Daily routine waste collected in dustbins placed at various locations, segregated into bio-degradable and non-bio-degradable types, and then emptied into movable containers and cans the transportation to the dumping yard.

**E-WASTE MANAGEMENT:** Electronic waste (E-waste) from laboratories is systematically collected and handed over to licensed recyclers. Any reusable components are salvaged or donated, while non-functional computers, monitors, and printers are scrapped according to a set procedure. Students are also educated and made aware of proper E-waste disposal practices.

**WATER RECYCLING SYSTEM:** Rainwater is collected from various buildings across the campus, including the main building, lifestyle and canteen. A portion of this collected rainwater is diverted to the garden within the main building's quadrangle, while the majority is directed to the and a rainwater harvesting pit located in the college.

**HAZARDOUS CHEMICAL AND RADIOACTIVE WASTE MANAGEMENT:** Chemical laboratories use Diluted acids, which are safely discharged directly into the drainage system. No radioactive materials are utilized on campus, ensuring that radioactive waste is not generated within the college premises

## Environmental policy

Our college promotes awareness and accountability by implementing green initiatives on campus, recognizing that the promotion of sustainable practices among students and stakeholders is essential for the development and upkeep of a green campus.

SS Institute of Pharmacy efficiently manages solid waste disposal, water recycling, sewage treatment, and the disposal of materials such as paper, plastics, electronics, and biological waste. The institute ensures effective resource management for the long-term wellbeing of the community, particularly in water conservation. Below are the measures taken by the institute to create and sustain a green campus:

### Landscaping with Trees and Plants

We enhance the environment by planting numerous trees and plants, which play a key role in regulating CO<sub>2</sub> emissions and serving as the "lungs" of the earth.

## Save Water, Save Lives

- Encouragement of closing taps when not in use and conducting frequent inspections of valves to detect leaks.
- Implementation of rainwater harvesting and used for watering plants.

## Use of Battery-Powered Vehicles

To minimize the use of non-renewable energy, our college encourages staff and students to use battery-powered vehicles, public transport.

## Pedestrian-Friendly Pathways

Campus pathways are designed for pedestrian use and feature clear logos and signboards for guidance.

### 1. Water Storage

The institute has water storage facilities to prevent shortages and to capture excess runoff during heavy rainfall.

### 2. Effluent Treatment in Laboratories

The institute follows Standard Operating Procedures for the disposal of hazardous chemicals from laboratories.

### 3. Water Conservation Awareness

Awareness programs are conducted to educate students on the importance of water conservation to address shortages and ensure sustainability. These programs are organized across all levels of society to emphasize the need for saving water.

## WATER CONSERVATION POLICY

SSIP dedicated to using water efficiently and is actively working towards enhancing its water Sustainability- This includes the installation of water-efficient fixtures and implementing rainwater Harvesting systems to conserve water resources effectively.

- Water conservation on campus primarily involves rainwater harvesting. Collected rainwater is directed to RWH for percolation during the rainy season.
- The campus maintenance bore wells to meet water requirement with measures in place for conserving water through and ground water recharging.

- Sensitization on water conservation is promoted through tree planting green campus activities and organizing seminar and workshop.
- Water reuse and recycling efforts aim to reduce water wastage with recycling water used for watering campus plants.
- Extension activities are conducted to educate and sensitize the local community about water conservation and its importance.

## REVIEW AND UPDATES

The water conservation policy will be reviewed annually or as needed to integrate new technologies best practices, and changing circumstances, with feedback from the college community taken into Consideration during the review process. Through this water conservation policy, SS Institute of Pharmacy aims to promote sustainable water practices and cultivate an Environmentally conscious community within its premises..
